WHAT HAS BEEN DISCUSSED + PENDING ISSUES

1. Separation of tasks for Sprint 3, issues created
2. Discussion on the unique feature implementation

CONCLUSION

- Unique feature: Based on the ingredients that the user has, there will be a tournament of recipes (binary tree of choices) to help the user decide which meal is the best choice. If no recipe is found, then generate one with the GEMINI API key, prompting with the ingredients.
- Weekly Planner will quickly be implemented so that other features can start
- Implementation of a loading screen after the Sign in in order for the Backend to do its work
